Equations have to be centered and right-numbered continuously.

$$A = \frac{B_C}{D} \cdot E - \sqrt{F + \left(1 + G\right)^2} , \qquad (1)$$

where A = quantity

B = quantity

C = quantity ...

REFERENCES IN TEXT AND BIBLIOGRAPHIC CITATION

When writing a reference to a bibliographic quotation in the text, the so-called **Harvard system** is used. The name of the author/s, the year of publication, and the link to the pages are given in parentheses. For example: according to other studies (Novak, 2015, p. 15-17), another opinion can be taken on this issue. If the authors name appears in the text, only one year and a link to the page/s are in parentheses. For example: according to Novak (2015, p. 15-17), another view can be taken on this issue.

If two or more sources of the same author have the same year of publication, they are distinguished by small letters of the alphabet assigned (without spaces) to the year of issue. For example: according to Horakova (2016a, p.25), a more appropriate method should be chosen. If it is necessary to include two or more sources in one link, they are given in one parentheses. and separated by a semicolon. For example: according to other studies (Novák, 2015; Horáková, 2016a), another opinion can be taken on this issue.

The bibliographic quotations are listed alphabetically in the final list according to the surname of the authors. Individual articles in the list are **not numbered**.

The quoted text is in italics.
